events. However, Dev fails to disclose a graphic display to allow the user to select alert types to be disabled or enabled.

Since Dev fails to teach or suggest each element of amended Claim 1, Claim 1 is not anticipated by Dev. Accordingly, Claim 1 is patentable. Claims 2-10, 32 and 33 depend, either directly or indirectly, from Claim 1 and are, therefore, patentable for at least that reason as well as for additional features when those claims are considered as a whole.

Claims 11, 20 and 23, as amended, also recite the use of a graphic display to allow the user to selectively disable or enable an alert or a notification. Accordingly, Claims 11, 20 and 23 are also not anticipated by Dev and are, therefore, patentable. Further, Claims 12-19, 21-22, 24-31 and 34-38 depend from patentable Claims 11, 20 and 23, and are, therefore, patentable for at least that reason as well as additional features.

In view of the foregoing amendments and remarks, all claims are believed to be in condition for allowance, and such allowance is earnestly solicited. A petition and a fee for a 2-month extension is attached herewith. If any issues remain to be resolved, the Examiner is invited to contact the undersigned to promptly resolve any such issues.

Respectfully submitted,

KNOBBE, MARTENS, OLSON & BEAR, LLP
